Objective

I wish to progress in the fields of software engineering and enterprise architecture. I would also like to utilise my project management experience to eventually lead a team in the development cycle of software products and a lot later, move towards more business facing roles such as a development manager.

I am open to various industries, required software languages and technologies.

I have attained personal skills in the following C# / .NET fields:

- Windows Forms
- User Controls
- Class Library and API Design
- N-Tier Design and OOP Patterns
- ADO .NET (SQL Server / Oracle)
- WCF
- XML/XSLT
- ASP .NET
- Sockets Programming (TCP/UDP)
- Multi-threading
- Graphics (GDI+)
- Microsoft XNA
- UML

Most of these .NET skills are demonstrated in my personal projects which you can download from my online portfolio located at www.martinblore.net

References are available on request.

Work Experience

2020 Mobile – Systems Analyst

04/2008 to Present

- R&D in Service Orientated Architecture.
- Optimising infrastructure using WCF.

2020 Mobile – Junior Systems Analyst

06/2007 to 04/2008

- Full product life cycle.
- Service orientated writing of and working to software architecture documents.
- Business to business solutions – maintenance of current systems.
- Research and development / reviewing emerging technologies.

Northern Foods – Lead Systems Developer

09/2005 to 06/2007

- Currently developing a manufacturing scheduling tool; based on C# and SQL Server Express.
- Wrote constraint based MRP system using Excel and VBA that automatically scheduled bulk material deliveries.
- Maintained and developed site SQL Server and interfaces for scheduling software.
- Wrote production reporting database based in Access 2000 / VBA that handled material usage / production plan split into factory shift patterns.

- Received award for most creative business ideas and KPI reporting.
- Received award for project managing the installation and logistic operations of a new production line.
- Created and implemented a database for training, skills, occupational health records, and safety issues; currently spanning 3 sites.

Northern Foods – Supply Chain Scheduler

03/2004 to 09/2005

- Weekly scheduling of 12 production lines using finite capacity scheduling software.
- Liaising with customer services to ensure timely delivery of customer orders.
- Manage MRP and vendors through SAP.

Northern Foods – SAP Implementer

09/2003 to 03/2004

- Worked in a SAP implementation team to deliver final phase of SAP at one of Northern's manufacturing sites.
- Analysed business requirements of site variances capture.
- Class room style training for SAP PP/PE users throughout the site.

Northern Foods – SAP Administrator

03/2002 to 09/2003

- Day-to-day house keeping and administration of factory SAP.
- Solving SAP financial variances.
- Classroom style end-user training and support.
- Factory IT hardware support.

Profile

- Able to work on own initiative and as part of a team.
- First class analytical, design and problem solving skills.
- Dedicated to maintaining high quality standards.
- Wide range of experience in the manufacturing industry.
- Can quickly adapt to changes and new technologies.

Education

9/2005 - 9/2006 Burton College, Burton, Midlands

Skills

ASP .NET	< 1 Year – Beginner/Intermediate
C#	2 Years – Intermediate
C++	5 Years – Intermediate/Expert
DirectX	5 Years - Intermediate/Expert
OpenGL	2 Years – Intermediate
Project Management	1 Year – Intermediate
SAP PP/PE/MM (Power User)	3 Years – Intermediate
Sockets Programming	2 Years – Intermediate
SQL Server	3 Years – Intermediate
Oracle	1 Year - Intermediate
